VoxIP

Education Capabilities For K12/Higher ED

Full Call Reporting

VoxIP VOIP system provides excellent call reporting capabilities to track unwanted or outbound calling.

Upgrading Services

Adding services are easy due to the programming capabilities of our staff. Most upgrades are done remotely and usually don't require rebooting of system

Free Demonstrations

If you are in the decision making process let our engineers setup a system onsite for a full 30 day demo, telephones, gateways included. Once you experience our system you won't want us to remove it.

Special Capabilities Specific For Education

Call Recording

System is ready for any combination of inbound/outbound/extension call recording. Calls are stored as WAV files and can be retrieved at the customers convenience.

Bell System Services

System can be configured to play at designated times a tone that plays over the overhead paging system to simulate bells for class dismissal.

Broadcast

System allows to make outbound calls for notification to any defined group via .CSV uploaded file that exports numbers and then dials the numbers predefined. Great for weather notifications, event changes, etc.

Conference Bridge

System is ready to host full conference bridge services for multi location training or employee meetings. Users dial internal extension or DID numbers to join conference.

Fax Server

System has built in fax server for inbound/outbound desktop faxing. Faxes are created as PDF and then email to recipient.

Multi-Trunk Capabilities

System, supports analog, digital, SIP and even Google voice to ensure an outbound line is always available. Always have 911 reachability.
