VoxIP

Medical Capabilities For Clinics/Hospitals

Full Call Reporting

VoxIP VOIP system provides excellent call reporting capabilities for billing of voice services.

Upgrading Services

Adding services are easy due to the programming capabilities of our staff. Most upgrades are done remotely and usually don't require rebooting of system

Free Demonstrations

If you are in the decision making process let our engineers setup a system onsite for a full 30 day demo, telephones, gateways included. Once you experience our system you won't want us to remove it.

Special Capabilities Specific For Medical Environments

Dictation Services

System is ready to support dictation services for medical examinations. Medical personnel can dial predefined extension and create dictation of patient visit. Dictation is compiled as a WAV file and email to predefined email address.

Call Recording

System can record all calls for quality assurance and reviewed later at each clients leisure. Great for legal, medical any call that needs to be documented.

Find Me Follow Me

System allows for each extension to call up to 3 numbers per the customer designation. Great for notifying medical personnel of emergency situations

Prerecorded Overhead Paging Messages

System can offer prerecorded messages for professional overhead paging of specific notifications.

Fax Server

System has built in fax server to receive faxes for your sensitive information via HIPAA regulations. Faxes are created as PDF and can be emailed to customer or can be retrieved via portal for increased security.. Outbound faxing is available as well for each client.
