VoxIP

Multi-Tenant Capabilities For Executive Suites

Full Call Reporting

VoxIP VOIP system provides excellent call reporting capabilities for billing of voice services.

Upgrading Services

Adding services are easy due to the programming capabilities of our staff. Most upgrades are done remotely and usually don't require rebooting of system

Free Demonstrations

If you are in the decision making process let our engineers setup a system onsite for a full 30 day demo, telephones, gateways included. Once you experience our system you won't want us to remove it.

Special Capabilities Specific For Multi-Tenant

Multi IVR/Auto Attendant

System is ready to support multiple IVR's for multiple customers. Analog, Digital, SIP trunks can be routed to a specific IVR for that individual client.

Multiple Directory Support

System can be configured with multiple directory to support dial by name for each tenant.

Find Me Follow Me

System allows for each extension to call up to 3 numbers per the customer designation..

Conference Bridge Services

System can offer each client their own conference bridge for professional conferences for webinars and training offerings.

Fax Server

System has built in fax server to receive faxes for your customer. Faxes are created as PDF and can be emailed to customer. Outbound faxing is available as well for each client.

Call Recording

System can record all calls for quality assurance and reviewed later at each clients leisure. Great for legal, medical any call that needs to be documented.
