

IP CONVERGENCE
Leverage your network

VoxIP

Vertical Business Needs

The VoxIP VOIP system has built-in features that customize to certain vertical business markets. Also, based on the multi-user capabilities, access can be granted for non-administrators to the service they only need to manage.

Hotels/Motels

Have the ability to schedule wake up calls for your customers 24/7.

Broadcast Announcements

Broadcast bulk announcements to parents, business closures, sporting or public venues if a schedule change needs to be broadcast out. Great for school districts, businesses, ticket services, etc.

Doctors Offices/Medical Clinic

Full Dictation services for medical environments. Medical staff can dial internal extension and record patient interaction. Once the staff completes call that recording can be emailed to dictation service without having to duplicate information..

Multi-Tenant

Great system for multi-tenant offices. Each customer can have own unique numbers, business hours and after hours auto attendant.

Remote Users

Have the ability to control customer interaction with your remote users. Inbound calls can easily be sent to external employees cell phones. Outbound calls can be made back into the system and out to your customer using the business caller ID. Unlimited scalability with voicemail and fax services,
